

What is Homeingle?

Homeingle is a social network that provides organizations (nonprofit, religious, community) with the online tools to connect with local businesses. Organizations and their members can create **needs** (items/services) for local businesses to respond to. Homeingle brings the foundation of communities closer to individuals, organizations, and businesses. With the current economic environment... every extra bit helps.

How does Homeingle work?

We provide tools beyond the typical social network.

- » Organizations and members that join Homeingle can create **needs** (items/services) regarding their groups, events and activities.
- » Businesses join Homeingle and create a custom profile. When local needs are created businesses are notified by email.
- » Businesses use Homeingle to communicate with the groups and individuals requesting needs.
- » These businesses are also listed in a directory for groups and individuals to browse. Businesses that use Homeingle show support for their community and are rewarded with a positive image and sales opportunities.

How can my business benefit from Homeingle?

Businesses that join Homeingle will be notified when local organizations post needs for their products or services. Businesses will also be listed in the Homeingle business directory and have unlimited ad placement when members of their community use Homeingle.

How much does Homeingle cost?

Homeingle is **free** for individuals and organizations to join, organize groups, events, and volunteer opportunities. Businesses are charged a small monthly fee of \$19.95. Since Homeingle is new (launched in January 2009), this rate will only be offered for a limited time. By being one of the first businesses to join you will be rewarded by locking in the \$19.95 per month rate for as long as you are a member.
